

# EV charging for hospitality

Attract guests and win corporate contracts with this modern amenity.

“ For others in the hospitality industry looking for EV charging options, I would point them to ChargePoint. It’s reliable, it’s reputable, it’s the largest in the nation — and the customer service is top-notch.”

— Gennero Filice, General Manager  
Oxford Suites of Sonoma County

## Create a great guest experience with an EV charging program

Provide an easy-to-use and integrated charging experience for your guests with ChargePoint® solutions.

### + Create loyalty

Integrate EV charging into your loyalty program to enhance the customer experience.

### + Be sustainable

Show you care about sustainability as soon as guests arrive, and wow them by showcasing environmental data from your charging program.

### + Know your data

Create custom financial and usage reports to see charging impact on revenue per room along with evolving guest needs.

### + Provide reliable charging

Offer guests a reliable charging solution with 24/7 driver and customer support and quick repairs.

## The ChargePoint solution

### Advanced hardware

Count on maximum uptime and an intuitive driver experience with ChargePoint networked AC and DC fast charging stations. Our user-friendly stations are easy to find and access through our top-rated mobile and in-dash app. Drivers can simply get in line using the Waitlist feature. You'll get unparalleled reliability with proactive station monitoring and field-serviceable, modular components that can be replaced individually — saving you time and money.

#### CP6000

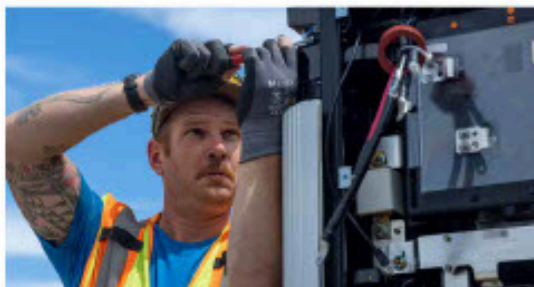

Next-generation AC charging engineered for the best ownership and charging experience

- + 12 kW (50A) or 19.2 kW (80A) power
- + Fully modular architecture for faster service and upgrades
- + Real-time LED status indicators for ease of use

### Easy-to-use software

Remotely configure and manage your charging solution across properties, including setting driver access and payment policies. Get real-time visibility into station activity and run comprehensive reports on greenhouse gas (GHG) emissions, kilowatt usage and station utilization through the ChargePoint Cloud Dashboard. Balance energy usage across stations with Power Management software and scale your solution as demand grows.

### Best-in-class services

Minimize downtime with the ChargePoint Assure® warranty program, offering 24/7 monitoring, one-business-day response time and hassle-free repair. Bundle hardware, installation, software and expert services into one flexible subscription package with ChargePoint as a Service®.
